Profile

Graduated in Software Engineering from FPT University (2021–2025), with a career focus on Backend / Full-stack Development. Experienced in building multi-layer web applications using ASP.NET Core MVC/Web API (.NET 8/9), Entity Framework Core, Spring Boot 3, REST APIs, JWT authentication, SQL Server, and PostgreSQL. Gained hands-on experience through academic and internship projects. Strong interest in clean API design, application security, data consistency, and maintainable code.

Education

Bachelor's Degree in Software Engineering

October 2021 - October 2025

FPT University, Can Tho, Vietnam

Soft Skills

Teamwork • Communication • Problem Solving • Research • Critical Thinking

Technical Skills

C# • Java • JavaScript • .NET • ASP.NET Core MVC/Web API • Spring Boot 3 • HTML • CSS • Bootstrap
• Tailwind CSS • jQuery • Entity Framework Core • SQL Server • PostgreSQL • GitHub/GitLab • Docker

Work Experience

Backend Team Lead – G1Mart Project

April 2024 - August 2024

FPT Software, Can Tho

- Coordinated the backend team by assigning tasks, tracking project milestones, and participating in technical reviews throughout the development of the G1Mart e-commerce system.
- Built RESTful APIs using **Spring Boot 3.3**, **Java 17**, **PostgreSQL**, **Spring Security**, and **JWT** for core features including products, product variants, shopping cart, orders, vouchers, inventory, staff management, and role-based access control.
- Integrated **VNPay**, **Cloudinary**, and **Swagger**; reviewed pricing, promotion, and order processing logic to improve data consistency, reliability, and overall system stability.
- Link website:** <https://g1mart.netlify.app/>
- Repo gitlab:** <https://gitlab.com/myproject31052003/G1Mart>

Project

G1Mart – E-commerce Management System

April 2024 - August 2024

Can Tho

- **Technologies:** React 18, Vite, MUI, Java 17, Spring Boot 3.3, Spring Data JPA, PostgreSQL, JWT, VNPay, Cloudinary, Swagger
- **Deployment:** Netlify, Render, Neon
- Developed a customer-facing storefront along with admin management modules for products, inventory, orders, vouchers, banners, shippers, returns, and reporting.
- Designed and implemented REST APIs following the **Controller** → **Service** → **Repository** → **PostgreSQL** architecture, securing endpoints with **Spring Security** + **JWT** and implementing multi-role authorization.
- Integrated **COD/VNPay payment methods**, **Cloudinary image uploads**, analytics dashboards, and **Swagger UI** for API documentation and local testing.
- **Link website:** <https://g1mart.netlify.app/>
- **Repo gitlab:** <https://gitlab.com/myproject31052003/G1Mart>

AccountMarket – Game Account Marketplace Platform

March 2026 - April 2026

Can Tho

- **Technologies:** .NET 9, ASP.NET Core MVC, Entity Framework Core 9, SQL Server, JWT Bearer, SePay, Cloudinary, MailKit, ClosedXML
- **Deployment:** Render, Azure SQL
- Built a game account marketplace web application featuring user authentication (sign up/sign in), password recovery, storefront, account detail pages, internal wallet system, purchase history, and admin management.
- Structured the solution using a **Web** → **Business** → **DataAccess** → **Models** layered architecture, with Razor Views consuming **DTOs** instead of directly accessing entities to improve separation of concerns and maintainability.
- Implemented the wallet-based purchase workflow using **database transactions**, ensuring account sale status updates, balance deduction, and creation of order, payment, and wallet transaction records with strong data consistency.
- Integrated **SePay webhook idempotency**, **Cloudinary** for image management, **MailKit** for email services, and **GitLab CI** with **SAST** and **Secret Detection** to enhance security in the CI/CD pipeline.
- **Link website:** <https://salegameaccount-aqlq.onrender.com/>
- **Repo gitlab:** <https://gitlab.com/myproject31052003/salegameaccount>

FUS – Learning Social Network Platform

May 2025 - August 2025

Can Tho

- **Technologies:** .NET 8,
- Developed a learning-focused social networking platform featuring posts, comments, groups, document sharing, events, project member matching, feedback, and violation reporting.
- Built the backend using a layered architecture: **ClientService** → **APIService** → **Services** → **Repository** → **SQL Server**, ensuring maintainability and clear separation of responsibilities.
- Integrated **JWT Bearer Authentication**, **Cookie Authentication**, **Google OAuth**, **Azure Blob Storage**, and **SignalR** to enable real-time chat and notifications.
- **Repo Gitlab:** <https://gitlab.com/g38592114/project>
